

TRANSPORT

PEOPLE TRANSPORTATION

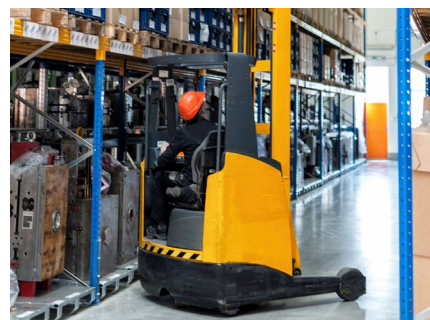

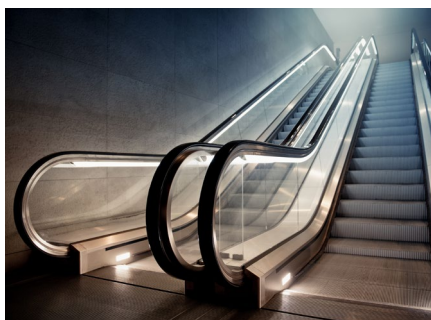

PIM offers a wide range of spare parts that fit your maintenance needs for lifts, escalators and moving walks. We can also manufacture or refurbish your rollers and pulleys for cable transportation, funiculars or inclined lifts.

MATERIAL HANDLING

From point A to point B, lots of solutions are available. We assist in multiple conveying system designs and we can offer standard products as well as custom-made products to help you achieve maintenance cost reductions and optimizations.

HANDLING EQUIPMENT

Wheels come in a variety of dimensions, shapes and hardness's. PIM manufactures rollers for pallet jacks, driving wheels for pallet truck stackers, press-on tyres,... etc in various PU formulations (soft, hard, high performance, water resistant, ...). Our Wheel Refurbishment department can restore any kind of wheels.

YOUR BUSINESS

LIFT, MAINTENANCE, END USER, DESIGNER, AIRPORT
MANAGER, RENTAL COMPANY...

PIM

Créateur de solutions polyuréthane

MULTIPLE PRODUCTS

High performances driving wheels

To go faster and last longer, our new formulations offer a higher resistance to extreme conditions (load, speed) than standard wheels from the market.

Guide rollers

Because there are more constraints on your conveying systems (traveler's bags, parcels, packages, materials,...), we manufacture custom-made over molded ball-bearings to increase reliability.

Rollers

These rollers will give you satisfaction in every conditions. Multiple references and options available.

Lift cabin guides

Special development of polyurethane and steel assembly to ensure better alignment and vibration absorption.

Polyurethane technical features

- Adherence
- Dynamic load
- Abrasion resistance
- Tearing resistance
- Chemical products and UV resistance
